Course Overview

This course will teach you how modern economies function at a macroeconomic level and how that relates to the business, world, and financial sectors and markets. This course will help you evaluate policy and business decisions in a logical and trained manner.

Prerequisite Requirements

Econ 200

Course Learning Outcomes

Upon completion of this course, students will be able to fulfill the objectives listed below.

General Objectives

1. GO.I. *Outline what is involved in the study of financial markets (such as bonds, stocks, and foreign exchange markets)*
2. GO.II. *Identify what it means to study financial institutions (i.e., banks, insurance companies, mutual funds)*
3. GO.III. *Describe why money is a major influence on inflation, business cycles, and interest rates*
4. GO.IV. *Apply these theoretical models to address real-world problems.*

Specific Learning Goals

SLG.I. Explain the relationships among business, government, and markets.

- You will learn to model how businesses, governments, and households operate together and interact in a market economy.

SLG.II. Explain the determinants of international trade and the workings of international markets.

- You will learn to model the advantages of international trade as it relates to comparative advantage.
- You will learn to interpret how international finance markets work.

SLG.III. Describe how alternative courses of action affect various individuals and social groups.

- After studying fiscal and monetary policy, you will interpret the reasons and effects of public policy.
- You will learn how to measure the impact of government policies on financial markets.

SLG.IV. Compare and evaluate the arguments supporting various government policies.

- You will be able to argue the pros and cons of fiscal vs. monetary policy.
- You will also learn the role of government based on market failures.

Course Readings and Materials

Please note that, in order to successfully complete this course, you are responsible for purchasing the required readings listed below.

Required Readings

F. Mishkin. *Economics of Money, Banking and Financial Markets* (13th ed. with MyLab). Pearson.

- You will access the full version of the electronic textbook and MyLab from the **Table of Contents -> Online Textbook and MyLab** area of Brightspace/D2L (on the left of screen) on the first day of class, **Monday, June 8th**, and the cost of the materials will be applied to student Bursar Accounts as "CampusStore PayOnePrice CrseMa". If you opt-out by the deadline, **Friday, June 12th**, you will receive a refund in 7-10 business days. You will receive detailed emails from University of Arizona Campus Store - no-reply@verbasoftware.com.
- **Remember:** If you do **not** take the textbook and MyLab (in other words opt-out), it will be your responsibility to purchase the textbook and MyLab in time to meet course requirements. Please note that faculty will not make exceptions or extend deadlines for students that have not acquired the correct textbook and MyLab. Please refer to the FAQs at https://shop.arizona.edu/textbook_faq for additional information.

Required External Webcam:

To take proctored exams through Honorlock, you will need to purchase an external webcam with **at least a 5-foot USB cable**. Important: Before purchasing your external webcam, please review the information at <https://tinyurl.com/2vbbhffn> carefully as some external webcams are *not* compatible with Honorlock.

Dry Erase Whiteboard, Marker, and Eraser:

Use of pens, pencils, or scrap paper is prohibited on the exams. Therefore, you will need to purchase a small, white dry erase board, dry erase marker, and eraser which you can use to write and do calculations during the exams.

An example of a suitable small (8.5 inch-by-11 inch) whiteboard can be found at <https://tinyurl.com/y5oxd57z> (see image on next page).

Course Workload Expectations

This course is structured around **5 weeks**. Given this extremely condensed timeframe, you should expect a considerably heavier than normal workload. The course workload is estimated as follows:

Course Item	Estimated Hours
Reading textbook chapters and watching video lectures	3-4 hrs./chapter
MyLab assignments	2-3 hrs./chapter
Written assignment	4 hrs.
Exam preparation	8 hrs./exam

This averages to approximately **30 hours/week**. These estimates will vary depending upon your existing knowledge level and/or time commitment. Preparing for exams will require additional time.

Course Schedule

The expected weekly progress and deliverables are outlined in the course schedule. Please see the course schedule as posted in the course space.

There is a considerable amount of material covered in this class. It is essential that you stay current with all reading and homework assignments. Note **DUE Dates** on course deliverables.

Working Ahead of Schedule

To maintain the integrity of the group learning environment, this course is not structured to allow students to work ahead.

Office Hours and Communications

Please use the **Ask the Instructor** discussion forum in the course space to contact me for content related questions. All students can then benefit from my response. I will respond within 24 hours of your post Monday through Friday and 48 hours on Saturday and Sunday. If you have a question regarding your personal performance in the course, please email me directly using the address above. I will provide feedback on course work that needs to be manually graded (e.g., essay papers, projects) within 3-5 days of submission. You will be able to see results for automatically graded course work (online quizzes and exams) after the specified deadline.

Office Hours

The instructor will host virtual office hours in the Zoom tool (located on the left of the screen under **Table of Contents -> Office Hours**) on Mondays at 9:00 AM (AZ time) and on Wednesdays at 2:00 PM (AZ time). Please **email a day in advance** in advance or the instructor will cancel office hours.

Course Time Zone

All dates and times mentioned in this course represent Arizona Standard Time (Arizona), which are UTC-7 hours. Arizona does not observe Daylight Savings Time. You can use the following link to get the current local time in Tucson, Arizona: <http://www.timeanddate.com/worldclock/city.html?n=393>

Assignments and Assessments

Generative AI Policy

Important: In this course, generative artificial intelligence/large-language-models (AI/LLM) tools, such as ChatGPT, Dall-e, Bard, and Bing, may be used to assist with research on graded course work, as long as there is proper acknowledgment and citation.

If you are in doubt as to whether you are using generative AI tools appropriately in this course, I encourage you to discuss your situation with me. Be aware that many AI companies collect information; do not enter confidential information as part of a prompt. LLMs may make up or hallucinate information. These tools may reflect misconceptions and biases of the data on which they were trained and the human-written prompts used to steer them. You are responsible for checking facts, finding reliable sources for, and making a careful, critical examination of any work that you submit.

Weekly Chapter Assignments

For each chapter, there will be an assignment to be completed on MyLab. These assignments are interactive and will include fill in the blank, multiple choice and graphing questions. For these assignments you will have 3 opportunities to answer each question. You will receive the highest score for each question. Most of these assignments are due on Sundays at 11:00 PM (AZ time). You will have the week before the due date to complete them. **Note:** each assignment is equally weighted. Full details, including submission instructions, are available in the **Table of Contents -> Learning Modules** area of the course space (located on the left of the screen).

Written Assignment

There will be one written assignment in this course, which asks you to discuss how an article relates to the concepts you have learned in this class. The written assignment should be submitted before you take the final exam. You can find the instructions for this assignment in the **Table of Contents -> Learning Modules -> Week 5** area of the course space.

Honorlock Webcam Requirement Quiz (proctored)

There is an ungraded, proctored quiz required for all students to ensure that you have read and understood the external webcam requirement that is needed for your proctored exams. It is a requirement for all students to complete this quiz to continue in this class. Full details about this quiz are located in the **Table of Contents -> Learning Modules** area of the course space. **Important:** please be aware that you might be asked to retake this quiz if the external webcam is not positioned correctly and does not show the **profile of your face, your desk, and your computer screen**. This may require placing the camera on a surface that is not your desk, such as an end table.

Exams (proctored)

There will be three exams. These will very closely model the chapter assignments. However, unlike the assignments, you will only have one chance to answer each question! The exams will also be timed. Once you have started an exam, you will have two hours to finish it. You will be able to start an exam at any time of the exam days as they are scheduled through Honorlock. You are free to use your notes and book to complete exams. *However*, depending on notes and book to answer the questions **will not** provide you enough time to finish the exam, so studying is ***absolutely indispensable*** to successfully taking the exam.

Important: You are **prohibited** from using a **pen, pencil, or scrap paper** during exams – you **must** instead use a **whiteboard, dry erase marker, and dry eraser**.

All exams must be taken during the exam window. **Important:** *Taking your exam on the last day of the exam window and then experiencing a technical issue or becoming ill on exam day does not extend the exam window for you.* It is advised to take your exam early in the exam window in case of any unforeseen circumstances, you will have the last day to still complete the exam during the exam window.

Exam #	Format	Time Limit	Special Instructions
Exam 1	Online Proctored	120 minutes	• At the beginning of the exam, you must show that you are not wearing earbuds. • Your microphone should be turned on for the entire exam duration. • The exam is open book, open notes. Notes should be printed or handwritten. • You are allowed to use a basic, nonprogrammable calculator (except for calculators on smart phones and tablets). • You are not permitted to use a smartphone or tablet <i>for any purpose</i> during the exam. • You are not permitted to use a pen, pencil, or scrap paper during the exam. • You are allowed to use a white dry erase board and eraser, and a dry erase marker. The white board must be clean at the beginning of the exam. • You must wipe the white board clean in view of the camera before submitting the exam. • Your hands should remain in view of the external webcam for the entire exam duration. • You may not read exam questions or answers aloud without a prior reasonable accommodation through the Disability Resource Center.
Exam 2	Online Proctored	120 minutes	
Exam 3	Online Proctored	120 minutes	

Proctored exams for this course **must** be taken through **Honorlock**. For information on Honorlock, please refer to the **Honorlock: College of Management Student Guide** website linked to each Honorlock item in the course space.

Any proctored exam interrupted by equipment or Internet connectivity problems can be required to be repeated at the faculty's discretion. Instructions will be provided to the student and Honorlock. A new exam must be successfully taken within the time frame stipulated by the faculty. If the retest is not successfully completed within the time frame set by the faculty, the student will receive a zero for the exam.

Required Webcam

Please pay particular attention to the information related to the **required** webcam provided in the **Course Readings and Materials** section of the syllabus.

Important: Failure to use the external webcam or set up the external webcam to properly show the exam environment (as shown on the **Honorlock: College of Management Student Guide** website linked to each Honorlock item in the course space) will lead to **severe** academic penalizations (including a 0 on the exam).

After live-authentication, each test is recorded from start to finish and is later viewed by a human, in its entirety, to ensure that no rules were violated.

Turning in Assignments

All graded assignments and assessments will be submitted electronically through the course space. Specific submission instructions are provided for each assignment in the **Table of Contents -> Learning Modules** area of the course space.

Missed Exam Policy

There will be no makeup exams for exams 1 and 2. A missed such exam with a valid excuse (such as a medical emergency) will result in the third exam composing 50% of the final grade. A missed exam without a valid excuse will be awarded a score of zero. Excuses other than a medical emergency need to be approved by the instructor at least three business days (Mon-Fri) before the day of the exam. A missed exam 3, with a valid excuse, will require a makeup exam, at the discretion of the instructor.

Absences for any sincerely held religious belief, observance, or practice will be accommodated where reasonable, in accordance with university policy. Absences pre-approved by the University of Arizona Dean of Students (or Dean's designee) will be honored.

Late Assignment Policy

Late assignments will not receive points. Please allow yourself time to mitigate any computer glitches. In order to earn a passing grade in the course you will need to complete and submit every assigned assessment by the end of the course, even if this implies submitting an assignment late and earning no points toward the final grade.

Course Grading

Course grades will be determined based on the items listed below.

Course Work	Percentage
Exam 1	25
Exam 2	25
Exam 3	25
MyLab Assignments	15
Written Assignment	10
TOTAL	100%

The approximate final course grade breakdown will be as follows:

Percentage	Letter Grade
90%-100%	A
80%-89%	B
70%-79%	C
60%-69%	D
0%-59%	E

Incomplete Policy

If you experience extraordinary circumstances beyond your control, which prevent you from completing the course within the scheduled 5-week timeframe, you must request an incomplete by emailing the Instructor ***before the end of the course***. Please clearly explain the reasons for the request and provide relevant documentation. Please be aware that you must be receiving a passing grade at the time of the request. If granted an incomplete, you should review the related policy stipulations at <https://www.registrar.arizona.edu/grades/incomplete-i-grade>

Academic Policies and Institutional Resources

As a University of Arizona student, you are expected to become familiar with and abide by the university-wide policies and procedures. You can find complete, up-to-date information at: <https://catalog.arizona.edu/syllabus-policies>

Academic Integrity

Upon accepting admission to the University of Arizona, you immediately assumed a commitment to uphold the Code of Academic Integrity. Complete copies of these policies can be found online at:

- The University of Arizona: <https://deanofstudents.arizona.edu/policies/code-academic-integrity>
- Eller College of Management: <https://eller.arizona.edu/programs/undergraduate/advising/policies-expectations/integrity-guide>

Any instances of academic dishonesty will result in a grade of E for the course.

While it is our sincere hope that you will not engage in academic misconduct, it seems prudent to clarify in advance the policy on dishonest behavior.

Reminder: this course has a zero-tolerance policy on cheating, including undeclared or deceptive use of artificial intelligence systems for document and content production.

Online Collaboration/Netiquette

In Eller Undergraduate Online courses, you will primarily communicate with instructors and peers virtually through a variety of tools such as discussion forums, email, and web conferencing. The following guidelines will enable everyone in the course to participate and collaborate in a productive, safe environment.

- Be professional, courteous, and respectful as you would in a physical classroom.
- Online communication lacks the nonverbal cues that provide much of the meaning and nuances in face-to-face conversations. Choose your words carefully, phrase your sentences clearly, and stay on topic.
- It is expected that students may disagree with the research presented or the opinions of their fellow classmates. To disagree is fine but, to disparage others' views is unacceptable. All comments should be kept civil and thoughtful. Remember that this course abides by university policies regarding disruptive behavior.

- Violations of the instructors' copyright violate the Code of Academic Integrity and may result in course sanctions.
- Compose your messages and posts in a word processing tool, and check your spelling and grammar before submitting your post / email.
- Students who are uncooperative, rude, abusive to a TA, instructor, staff members, or other students, whether in class or outside class, will be penalized.

UA Eller UG Online Student Support

The instructor is available to assist with **content-related** issues. You may, at any time, email the instructor. This course also provides an **Ask the Instructor** discussion forum. You are encouraged to post content-related questions to this forum at any time. The instructor monitors this forum on a regular basis and will respond in a timely fashion. It is common for other students to participate in answering questions posted in the **Ask the Instructor** forum. You should feel free to contribute to the solution if you can provide knowledge or guidance related to the question.

The following are guidelines for requesting support:

- **General Course Questions:** Use the **Ask the Instructor** discussion forum for questions regarding course materials or policy.
- **Personal Course Questions:** Email the instructor to discuss grades or personal concerns.
- **Course Registration & Curriculum Questions:** Please refer to the <https://ugrad.eller.arizona.edu/online/contact> web site for the appropriate contact information.
- **Brightspace Support Questions:** Click on <https://studenthelp.intech.arizona.edu/article/261-contact-us> to submit your tech support request.

Statement of Copyrighted Materials

All course materials (for example, lecture notes, lectures, and study guides) disseminated by the Instructor to the students, whether in class or online, are original materials and reflect the intellectual property of the instructor or author of those works as well as the Arizona Board of Regents (ABOR). All course materials are intended for individual use by students. You may not distribute or reproduce these materials for commercial purposes without the express written consent of the Instructor. Students who sell or distribute these materials for any use other than their own are in violation of the University's Intellectual Property Policy (available at <http://policy.arizona.edu/research/intellectual-property-policy>). Violations of the Instructor's and ABOR's copyright may violate the Code of Academic Integrity and result in course sanctions.

Technology Requirements & Technical Support

Please ensure that your equipment and Internet connection meet the criteria specified on the **Technology Requirements** website located on the left of the screen in the *Technical Requirements & Support* area of the course space. Also, information on how to contact technical support is available on the **Technical Support** website located on the left of the screen in the *Technical Requirements & Support* area of the course space.

Disability Accommodations

At the University of Arizona, we strive to make learning experiences as accessible as possible. If you anticipate or experience barriers based on disability or pregnancy, please contact the Disability Resource Center (520-621-3268, <https://drc.arizona.edu/>) to establish reasonable accommodations.

Library Support

The University of Arizona Libraries is dedicated to providing the research tools you need at any time. For an abbreviated list of resources directly related to a specific course, select the **Library** link (located in the *Table of Contents* on the left of the screen). If you need any assistance, please contact the library using the **Chat** or **Ask Us** tools on the <https://lib.arizona.edu/> website.

Student Resource Center

For the duration of the program, you will have access to the Student Resource Center at <http://ugrad.eller.arizona.edu/online> where you can find comprehensive, up-to-date information on a wide variety of topics, including the Eller Online Undergraduate program learning outcomes, academic advising, financial aid, and other topics to help you succeed.

Workload and Course Requirements Subject to Change

Workload and Course Requirements are subject to change at the discretion of the instructor with proper notice to the students.

Errata

The instructor reserves the right to revise the syllabus as necessary to correct typographical errors, factual errors, omissions, or other material included herein as needed to correctly reflect the requirements of the course.
